ENJOY THE SWEET LIFE!

White Pine

SCIENTIFIC NAME: *Pinus strobus*

FAMILY: Pinaceae

ORIGIN: Eastern North America

We planted these White Pine trees in 1995. They make a great windbreak and help to create privacy as they block and mitigate vehicle lights and traffic noise. Also for an

added bonus, the pine straw that continuously falls from these trees makes the best smoker fuel for smoking the honeybees here in our apiary.

Pinus strobus, commonly called the eastern white pine, northern white pine, white pine, Weymouth pine, and soft pine is a large pine native to eastern North America.

White Pine is highly adaptive and grows well in a variety of soils types through out Indiana. Pine has been one of the most widely used lumber types in the world for many years.
